

FREE BOILER Replacement Scheme

creating warm & healthy homes

Was your boiler installed before 2005 or do you have NO central heating?

If so, you could qualify for a 100% free boiler!

Boilers account for around 60% of what you spend in a year on energy bills, so an efficient boiler makes a big difference. New boilers use less fuel which means they are cheaper to run and have lower harmful CO2 emissions.

Replacing your old boiler with a new, energy efficient boiler will:

- make your home cheaper to heat
- cut your energy bills
- be safer and more reliable
- help to reduce damp
- improve your home

By replacing your old boiler with a new 'A rated' one, you could reduce your energy bill by around a quarter –

**saving between
£300 - £580 p/a***

**COMBAT THE
HIGH ENERGY
PRICES WITH A
FULLY FUNDED
'A' RATED
BOILER**

£ Save Money

Save Energy

Stay Warm

Who can apply?

The offer is available on a first come, first served basis to all homeowners with inefficient existing **non-condensing boilers** installed before 2005.

Three qualifying routes:

1. **NHS Referral** for health conditions related to limited mobility / cardiovascular / respiratory / immunosuppressed
Or...
2. **Low Income** where household earns **less than £31,000** (before tax)
Or...
3. **Qualifying Benefits** where someone in the household is in receipt of means tested benefits, such as Pension Credit, Tax Credits, Universal Credit etc

Why is it free?

Under the Government's newly launched ECO4 Scheme, there is a huge push on helping to lower energy bills across the UK, where there is £1 billion worth of funding per year.

Don't just take our word for it – do a google search for **"ECO4 delivery guidance v1.1"** where you can view a PDF on OFGEM's website. Check out pages 57-58, 95, 106 & 124.

Why have I received this leaflet?

We believe you have a **non-condensing boiler** because you have one of these flues:
